

product type designation

Antenna ANT895-6ML

ANT895-6ML GPS antenna Antenna with integrated signal amplifier incl. 0.3 m connection cable and N-Connect female connection; 3 dBi, IP67 (-40...+85 °C) Mounting with magnet or Screw mounting Observe national approvals; compact instructions as hard copy German/English; scope of delivery: 1x ANT 895-6ML.

suitability for operation	GPS
radio frequencies	
type of satellite navigation system / is supported / GPS, GLONASS and Galileo	Yes
operating frequency	1575.42 MHz
electrical data	
antenna gain compared to spherical radiator	
• with circular radiation	3 dB; at 90°
design of the signal amplifier / integrated	two-stage, low noise
supply voltage / from antenna cable	2.7 ... 5 V
type of voltage / of the supply voltage	DC
consumed current / maximum	2 mA; at 5 V
amplification	20 dB
design of the intermediate frequency filter	dual high rejection SAW filter
polarization	Right hand circular
radiation characteristic	GPS
number of electrical connections / of the antenna	1
type of electrical connection / of the antenna	N-Connector
design of plug-in connection	female
ambient conditions	
ambient temperature	
• during operation	-40 ... +85 °C
protection class IP	IP67
design of the overvoltage protection	Integrated protection up to 15 KV
design, dimensions and weights	
width	45 mm
height	51 mm
depth	12 mm
net weight	130 g
fastening method	Magnet or screw mounting
fastening method	
• directly on the device	No
wire length / of antenna cable	0.3 m
product features, product functions, product components / general	
product feature / silicon-free	Yes
standards, specifications, approvals	
certificate of suitability	
• RoHS conformity	Yes
wireless approval	Current national approvals can be found on the Internet under

	www.siemens.com/mobilfunkzulassungen
reference code / according to IEC 81346-2:2019	TFB

security information	
security information	<p>Siemens provides products and solutions with industrial cybersecurity functions that support the secure operation of plants, systems, machines and networks. In order to protect plants, systems, machines and networks against cyber threats, it is necessary to implement – and continuously maintain – a holistic, state-of-the-art industrial cybersecurity concept. Siemens' products and solutions constitute one element of such a concept. Customers are responsible for preventing unauthorized access to their plants, systems, machines and networks. Such systems, machines and components should only be connected to an enterprise network or the internet if and to the extent such a connection is necessary and only when appropriate security measures (e.g. firewalls and/or network segmentation) are in place. For additional information on industrial cybersecurity measures that may be implemented, please visit www.siemens.com/cybersecurity-industry. Siemens' products and solutions undergo continuous development to make them more secure. Siemens strongly recommends that product updates are applied as soon as they are available and that the latest product versions are used. Use of product versions that are no longer supported, and failure to apply the latest updates may increase customer's exposure to cyber threats. To stay informed about product updates, subscribe to the Siemens Industrial Cybersecurity RSS Feed under https://www.siemens.com/cert. (V4.7)</p>
