#### SITOP PSE200U/4X0.5-3A/SEO/NECCLASS2

SITOP PSE200U 3 A NEC CLASS 2 selectivity module 4-channel input: 24 V DC/12 A output: 24 V/4x 3 A NEC class 2 threshold value adjustable 0.5-3 A with status message for each output

input				
type of the power supply network	Controlled DC voltage			
supply voltage at DC rated value	24 V			
input voltage at DC	22 30 V			
overvoltage overload capability	35 V			
input current at rated input voltage 24 V rated value	12 A			
output				
voltage curve at output	controlled DC voltage			
formula for output voltage	Vin - approx. 0.2 V			
relative overall tolerance of the voltage note	In accordance with the supplying input voltage			
number of outputs	4			
output current up to 60 °C per output rated value	3 A			
Adjustable output current	0.5 3 A			
type of response value setting	via potentiometer			
response delay maximum	5 s			
product feature parallel switching of outputs	No			
type of outputs connection	Simultaneous connection of all outputs after power up of the supply voltage > 20 V, delay time of 25 ms, 100 ms or adjustable "load optimised" via DIP switch for sequential connection			
power loss				
efficiency in percent	97 %			
power loss [W] at rated output voltage for rated value of the output current typical	9 W			
switch-off characteristic				
switching characteristic				
<ul> <li>of the excess current</li> </ul>	lout = 1.01.1 x set value, switch-off after approx. 5 s			
<ul> <li>of the current limitation</li> </ul>	lout = 1.1 x set value, switch-off after typ. 100 ms			
<ul> <li>of the immediate switch-off</li> </ul>	lout > set value and Vin < 20 V, switch-off after approx. 0.5 ms			
residual current at switch-off typical	1 mA			
design of the reset device/resetting mechanism	via sensor per output			
remote reset function	Non-electrically isolated 24 V input (signal level "high" at > 15 V)			
protection and monitoring				
fuse protection type at input	5 A per output (not accessible)			
display version for normal operation	Three-color LED per output: green LED for "Output switched through"; yellow LED for "Output switched off manually"; red LED for "Output switched off due to overcurrent"			
	Status signal output (pulse/pause signal, can be evaluated via Simatic function			
design of the switching contact for signaling function	block)			
safety	DIOCK)			
	DIOCK)

security information					
security information	Siemens provides products and solutions with industrial cybersecurity funct that support the secure operation of plants, systems, machines and network In order to protect plants, systems, machines and networks against cyber threats, it is necessary to implement – and continuously maintain – a holisti state-of-the-art industrial cybersecurity concept. Siemens' products and solutions constitute one element of such a concept. Customers are respons for preventing unauthorized access to their plants, systems, machines and networks. Such systems, machines and components should only be connec- to an enterprise network or the internet if and to the extent such a connection necessary and only when appropriate security measures (e.g. firewalls and network segmentation) are in place. For additional information on industrial cybersecurity measures that may be implemented, please visit www.siemens.com/cybersecurity-industry. Siemens' products and solutions undergo continuous development to make them more secure. Siemens stron recommends that product updates are applied as soon as they are available and that the latest product versions are used. Use of product versions that a no longer supported, and failure to apply the latest updates may increase customer's exposure to cyber threats. To stay informed about product updates subscribe to the Siemens Industrial Cybersecurity RSS Feed under https://www.siemens.com/cert.
